

THE STATUS OF BARIATRIC SURGERY IN THE UK

HOSTED BY RCS ENGLAND IN CONJUNCTION WITH THE ALS, AUGIS & BOMSS

This meeting is a chance for surgeons to reflect on the current delivery of bariatric services in the UK and their future development.

It will include representatives of BOMSS, AUGIS and ALS who are responsible for the constant improvements in the patient experience, most recently with the bariatric database, and will be chaired by the President of The Royal College of Surgeons of England, Mr John Black.

The scale of the public health challenge, the disease model and current UK and international practise will be discussed and the final round table discussion aims to issue a consensus statement on bariatric surgery in the UK.

- » The public health challenge
- » The disease model
- » Current UK and international practise
- » Into the future: commissioning, quality assurance, education and training

This will be of interest to everyone involved in bariatric surgery in the UK and has been arranged to coincide with the BOMSS scientific meeting.

To register for this meeting please complete the online booking form here:

web.rcseng.ac.uk/bariatric_registration/

Further information on the BOMSS meeting can be found here:
